

HEC Plus

Utilizing high-performance aliphatic polycaprolactone-based TPU material, HEC Plus shows exceptional tensile strength and hydrophobic properties. It's engineered for people who're seeking meticulous protection of automotive paint, it provides the highest level of safeguarding for the vehicle's finish.

CATEGORY	VALUE	CATEGORY	VALUE
Top Coating	Polyoptico™	Film Thickness	9 mil
60°Surface Gloss	96 GU	Hydrophobic Angle	96°
Elongation at Break (ASTMD-882)	330%	Tensile Strength (ASTMD-882)	35 MPa
Tear Strength (ASTMD-882)	84 KN/m	Initial Peel Adhesion (ASTMD-882)	24 N/in
Aging Resistance (UV Test:6000H)	Pass	Chemical Resistance (Acid Test)	Pass
Impact Test (SAE J400)	Pass	Warranty	10 Years
Healing Performance	Thermal Self-Healing	Stain Resistance	★★★★★
Easy Installtion	★★★★★	Optical Clarity	★★★★★

Note: 1. All the above values are nominal and should not be used for specification purposes.
